Allowable Subject Matter

1. Claims 1-15 and 17-20 are allowed.

2. The following is an examiner's statement of reasons for allowance:

Nishii (US Pat. 950 B2) discloses a system including a CPU 76 of a printer 1 determining whether a person approaching the printer 1 is wearing ID card 6 matches one of the ID numbers stored in management memory 16; the CPU 76 receives radio wave communication for user identifying portion 19 (col. 6, lines 1-20). Further, the controller of the printer determines that the person wearing the ID number matches an ID number stored within the memory or the controller, the printer job will then begin (col. 7, lines 55-67; col. 8, lines 18-67; col. 9, lines 1-5). Nakamura (US Pat. 464) discloses a system that recognizes a user's ID number prior to operating an imaging device, a plurality of ID numbers are detected and presence of respective print jobs corresponding to these ID numbers is confirmed, prioritization in outputting is determined based on this managed history information so that a print job requested by a user with a shorter average picking-up period is outputted earlier (col. 31, lines 7-43). However, neither of the above references nor any of the prior art of record disclose in their entirety or in combination the claimed method of preparing an imaging device for use, comprising: remotely detecting a potential user (could be any person), of the imaging device is a likely user (based on the system determining that the potential user is one that may use the imaging device based on history behavior, set up by network administrator, or detection at an internal entrance), of the imaging device in response to remotely detecting the potential user, and beginning an

initialization of the imaging device in response, at least in part, to remotely detecting the potential user and determining that the potential user is a likely user of the imaging device.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
